PUBLIC NOTICE

FAIRBURY COMBINED SEWER OVERFLOW LONG TERM CONTROL PLAN IMPLEMENTATION

The City of Fairbury, IL has accepted bids to do rehabilitation and improvement work to the existing Waste Water Treatment Plant, pump stations, and approximately 9,000 lineal feet of gravity sewer and force main installation. In doing this work, combined sewer overflows will be eliminated, and aged piping and pump stations will be upgraded so more flow can be transported to the plant for treatment. Major improvements to the plant will be constructed to address failing and aged structures and have the capacity to treat more flow. Funding for this project is provided by a low interest loan from the Illinois Environmental Protection Agency's Public Water Pollution Control Loan Program (WPCLP). The WPCLP is funded by both state and federal sources. The \$30,431,034.75 loan has an interest rate of 1.00% and will be repaid over a period of 30 years. The City qualified for 30% loan principal forgiveness (\$9,129,310.00) and will be accounted for at project completion. The implementation work will meet the recommended water and sewer standards. For more information, contact the Fairbury City Hall at 815-692-2743
